Methods of increasing students' motivation to perform R&D in the interests of enterprises of the real sector of the economy

Abstract: Involving students in the implementation of real research projects and works is one of the fundamental principles of training qualified engineers. However, in practice, the implementation of such projects often faces a number of objective and subjective difficulties. The report presents the experience of performing scientific research and research and development work in the interests of enterprises in the real sector of the economy with the involvement of undergraduate and graduate students.
